Circle the letter in front of the correct answer:

6. In the ERG, which colored section contains information on potential hazards, emergency response, and protective clothing:

- A. Blue Section
- B. Yellow Section
- C. Orange Section
- D. White Section

7. You can find all of the following information for a given chemical in the Hazmat Compliance Pocketbook EXCEPT:

- A. Proper Shipping Name
- B. Health Hazards
- C. Hazard Class
- D. Packing Group

8. What does this DOT placard or label mean?

- A. Biological hazard
- B. Oxidizer
- C. Organic peroxide
- D. Corrosive

9. The packing group with the highest level of danger is:

- A. PG I
- B. PG II
- C. PG III
- D. None of the above

10. What does “1090” represent on this placard?

- A. The materials packaging group
- B. The materials UN/NA Number
- C. The materials Emergency Response Guide Number
- D. The materials Reportable Quantity

Circle the letter in front of the correct answer:

11. What Class/Division is this placard for?

- A. Class 5, Division 1 (Oxidizer)
- B. Class 1, Division 5 (Explosive, Blasting Agent)
- C. UN Number 0151 (Pentolite)
- D. ERG Guide 151 (Nicotine Sulfate, Solid)

12. In the basic description of a HAZMAT on the shipping paper, you must list the items in this order:

- A. Proper shipping name, UN/NA ID number, hazard class, PG
- B. UN/NA ID number, Proper shipping name, hazard class, PG
- C. UN/NA ID number, proper shipping name, PG hazard class
- D. The order of the items doesn't matter if it's highlighted.

13. What shipping paper must be used with a shipment of hazardous waste?

- A. UN/NA Declaration of Hazardous Waste.
- B. Uniform Hazardous Waste Manifest.
- C. Bill of Lading with "Hazardous Waste" clearly printed.
- D. Hazardous Waste Information Sheet.

14. Which hazmat class requires placarding, even if you are transporting an amount that is below the Reportable Quantity?

- A. Class 3 (Combustible Liquid)
- B. Class 4 (Dangerous When Wet)
- C. Class 5, Division 1 (Oxidizer)
- D. Class 8 (Corrosive)

15. A package of HAZMAT that is poisonous by inhalation must be marked with this marking:

- A. RQ
- B. DANGER
- C. Inhalation Hazard
- D. Toxic

Circle the letter in front of the correct answer:

16.If a vehicle needs to be placarded, where must the placards be?

- A. One on the right side, and one on the left side (total of two placards)
- B. One on each side, and one on the rear (total of three placards)
- C. In the place most easily seen (total of one placard)
- D. One on each side, and the front and rear (a total of four placards)

17.It is OK to accept a box containing HAZMAT that has a stain:

- A. As long as the stain has dried
- B. If the stain is not wet enough to spread to other containers
- C. If the material is compatible with other materials in the vehicle
- D. It is never OK to accept a HAZMAT box that is stained

18.In the DOT Segregation Table, what does “X” mean?

- A. These two HAZMAT classes may not be loaded on the same truck.
- B. They may be loaded on the same vehicle if they are separated.
- C. They may be loaded on the same vehicle, but not in the same box.
- D. They may be loaded on the same vehicle if it has placards for both.

19.If you are driving a hazmat load and are involved in a traffic accident, you should:

- A. Take the shipping papers and Emergency Response Guide, and leave the vehicle
- B. Contact emergency response personnel
- C. Keep others away and upwind from the vehicle
- D. All of the above

20.Which of the following is a way to increase the security of hazardous material in transportation:

- A. Discussing hazmat over your CB radio
- B. Varying the original route
- C. Checking the identification of the person who receives the shipment
- D. Don't communicate with your dispatcher
